

If you are hesitated to lose your health slowly by because of the pesticides and insecticides, you shall to use an all-natural product such as PEST STOP 88 for to stop their infestations. PEST STOP 88 is an all-natural organic insect repellent. It is specially formulated using herbal ingredients to combat the most common plant pests.

PEST STOP 88 targets the most common pests and / or insects such as; thrips, tuta absoluta, aphids, ants, mealybugs, scalebugs, stinkbug, mites, gallic bees, leafhoppers, whiteflies, red spiders, potato beetles, mole beetles, psyllids, may beetles, olive flies, mediterranean flies, sucking insects, caterpillars, zenk and more..

The pests listed above feeds on the fruits, flowers, seeds, leaves, branches, and shoots of plants in various ways, multiplying and causing permanent damages to the plants. In some cases, they can cause complete plant death or decays. Furthermore, pathogenic bacteria and fungi can enter plants through wounds and cause rot. They can damage many crops and they mostly damage the tuber plants. PEST STOP 88 allows you to cure all these negative effects.

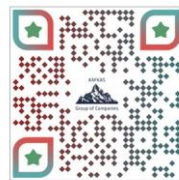

There are certain plants in the nature that irritate plant pests and keep them away from fields and gardens. We have prepared a special liquid solution using the extracts of these plants. This solution is mixed with water and sprayed on to the plants and leaves. When pests detects this solution on plants and leaves they are irritated by the herbal extracts preventing them from laying their larvae and eggs on the leaves and surviving on the plants.

PEST STOP 88 does not kill pests, but it does completely repel them from plants. This eliminates the need for chemical pesticides and poisons. It will allows the farmers to make organic agriculture and cultivate natural foods.

Please note that; 'PEST STOP 88 is not a pesticide!' It is not advised to mix with the pesticides, insecticides and / or other chemicals.
