Agro Kafkas Organik Tarım A.Ş.

"DOĞAYA RENGİNİ VEREN GÜBRE"

AS AGROMIX Liquid Wormcasting Fertilizer can be applied below listed;

- * Industrial agricultural fields
- * Hydroponic Systems
- * All kinds of fruits and nuts
- * Nurseries
- * Vegetable Seedlings
- * Greenhouses
- * Natural flower bulbs
- * Indoor and outdoor ornamental plants

AS AGROMIX Organic Liquid Wormcasting Fertilizer is a 100% natural and organic plant nutrition product that can be used safely in all kinds of plant production. **"It doesn't contain any chemical additives.!"**

Thanks to the NPK, macro and micro elements, humic and fulvic acids, beneficial bacteria, amino acids and enzymes in its content, it combines the benefits of microbial fertilizers for plants and soil in a single product.

Our products do not contain molasses and silempe. Because the products that use molasses and silempe as raw materials feed the plants, but they also attract flies and insects to the applied plant.

AS AGROMIX Organic Liquid Wormcasting Fertilizer maintains the ecological balance. It doesn't cause adverse effects that can be seen in chemical products due to overdose.

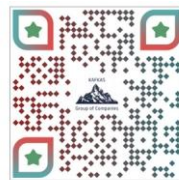

Depending on the soil and leaf analysis and in line with the recipe prepared by your agricultural consultant, 1 decare of land can be fertilized with a minimum of 1 liter of liquid fertilizer.

Due to its liquid form, it quickly penetrates the roots and soil. It is suitable for use in all plants. It has a natural drug effect against plant pests. It is tea-colored and odorless. It supports the physiological structures of plants, provides resistance against root diseases and nutrient deficiencies.

FREQUENTLY ASKED QUESTIONS

- "What does the AS Agromix Liquid Wormcasting Fertilizer?"

It makes plant nutrients such as Nitrogen, Phosphorus and Potassium 'NPK' soluble in the soil and facilitates their uptake by the plant. Thanks to the enzymes it contains, it suppresses pests and increases the amount of beneficial bacteria and micro-organisms in the soil. It stays in the soil for a long time, nourishes the soil and provides high efficiency. By this way, our farmers do not need to apply any chemical fertilizers, pesticides or herbicides.

BİTKİ BESLEME / BİTKİ KORUMA
TOPRAK İYİLEŞTİRME ÜRÜNLERİ

- It is %100 Ecological and non-toxic.
- It does not pollute the water, air and soil.
- It helps plants to form a solid root system.
- It does not clog in foliar and drip irrigation systems.
- Increases the water holding capacity of the soil by 40%.
- Increases the resistance of plants against stress and pathogens.
- High quality, productive and long shelf-life products are obtained.
- Increases the organic matter content of the soil, improves its productivity.
- Regulates acidic and sandy structures and makes them suitable for agriculture.
- Improves soils with low humus, stimulates beneficial microorganisms in the soil.
- It protects the plant against the negative effects of weather conditions (frost, temperature differences, etc.)
- It is effective both as a source of nutrients for plants and as an incentive for their growth at the same time.

- “What is the AS Agromix Liquid Wormcasting Fertilizer contents?”

AS Agromix Liquid Wormcasting Fertilizer has a well-balanced ‘NPK’ content including with Secondary Elements, Micro Elements, Humic and Fulvic Acid. It has also a microbial content and includes so many beneficial bacteria, micro-organisms and enzymes. It is designed for plant nutrition, plant protection and soil conditioner.

AS Agromix Liquid Wormcasting Fertilizer is not a pesticide or a herbicide and all its production has made from non-chemical content but when you apply it to your plants, you will not need to apply any extra pesticides or herbicides. It does not contain weed seeds. By this way, you will be free from unwanted grasses in the soil. This will also decrease herbicide costs.

When foliar application is made, it provides a protective layer on the leaves and stems of the plants. By this way, plant pests cannot cling to the plant and you will be protected from plant pests by natural means. In this way, your pesticide costs will also decrease.

- “How much do we need to apply the AS Agromix Liquid Wormcasting Fertilizer in 1 Acre (1000 Sqm)?”

Before an application, it is highly recommended to have your soil analyze report and than ask for a professional assistance from an Agricultural Engineer.

Generally, we offer to apply 1 Liter AS Agromix Liquid Wormcasting Fertilizer into 20 Liters of fresh water and than you can apply this fertilized solution in 1 Acre with holder machines, pulverizators or with drip irrigation systems.

If you used chemical fertilizers before and if your soil is tired with chemicals, you can also apply our organic products with more dosage for refreshing your soil faster.

Our products are %100 Organic and non-toxic and none of our products harms your soil or plants but the application dosage needs to be asked to a professional and needs to have a special application dosage for your soil and plants.
